

ClickView LinkStart Plus

LinkStart Plus is a performance add-on to the ClickView software, bringing LinkStart inside your school network for lightning-fast access to videos via URL.

Unlike the default LinkStart, LinkStart Plus is not dependant on an active connection to the internet. When you click on the URL link www.clickview.yourschool.edu.au/?videoid=1 to download the video, the request is sent directly to your ClickView Library Server - not out to the ClickView internet server.

This makes the download considerably faster, taking only milliseconds as opposed to seconds with the default LinkStart.

The ClickView Library Server now sends a small version of the ClickView Player when the video is downloaded - providing ClickView access to PCs which do not have the ClickView Player installed.

Pricing

A\$799.00 (ex. GST) once-off software purchase

This includes remote setup and support

System Requirements

- Windows PCs require .NET 2.0
- DivX 5.1 or greater to view videos
